

## Quality, Health and Safety and Environmental Policy

Lev-Fab is a company specialized in folding, bending and the processing of sheet metal as well as welding for aerospace and industrial contracts that put customer satisfaction as a priority when it comes to the quality of the product itself or a desire to maintain and improve said quality.

### To do this, Lev-Fab:

- Ensures the customer that the management and the employees are committed to preserving and improving its products, the timeliness of its delivery, and other factors that contribute to the customer's satisfaction.
- Solicits and recognizes the contribution of each employee in each process towards continuous improvement.
- Solicit and acknowledge the contribution and involvement of each employee in each of the processes aimed at preventing pollution and preserving the environment.
- Solicit and acknowledge the contribution and involvement of each employee in each activity by ensuring health and safety at work.
- Considers that its employees are entitled to a safe and healthy work environment. Promotes the prevention of accidental events and occupational diseases in the workplace as well as equitable management of rehabilitation and return to work.
- Puts in place safe mechanisms to ensure that the commitment to continuous improvement of quality or environmental performance can be expressed and taken into account.
- Calls for appropriate staff awareness of the importance of recycling and the reduction of waste that has a significant impact on the environment during operations.
- Ensures that communication channels, responsibilities and decisions-making processes on quality and eco-responsible production are known to employees and customers.
- Seeks total compliance with all requirements and applicable regulations including the requirements of compliance with the environmental and health and safety obligations.
